Nara Wallet

Your wallet, just a chat away.

Exevutive Summary

Global crypto adoption reached 659 million people in 2024 (6.8% of the population), yet most users struggle with complex onboarding, technical jargon, and fragmented tools, which limits active participation. Nara Wallet solves this by offering an AI Agent with natural conversation that lets anyone create wallets, manage assets, buy with fiat, and compare market prices in real time. By simplifying the experience and building trust, it lowers barriers and supports broader mainstream adoption.

Background and Problem

The global crypto market continues to grow, with 659 million users worldwide by the end of 2024. However, only 30–60 million are active transactors monthly, showing limited real engagement. Studies highlight ease of use, trust, and accessibility as the biggest adoption barriers. Current wallets remain too technical and confusing, creating friction for new users and slowing mainstream adoption.

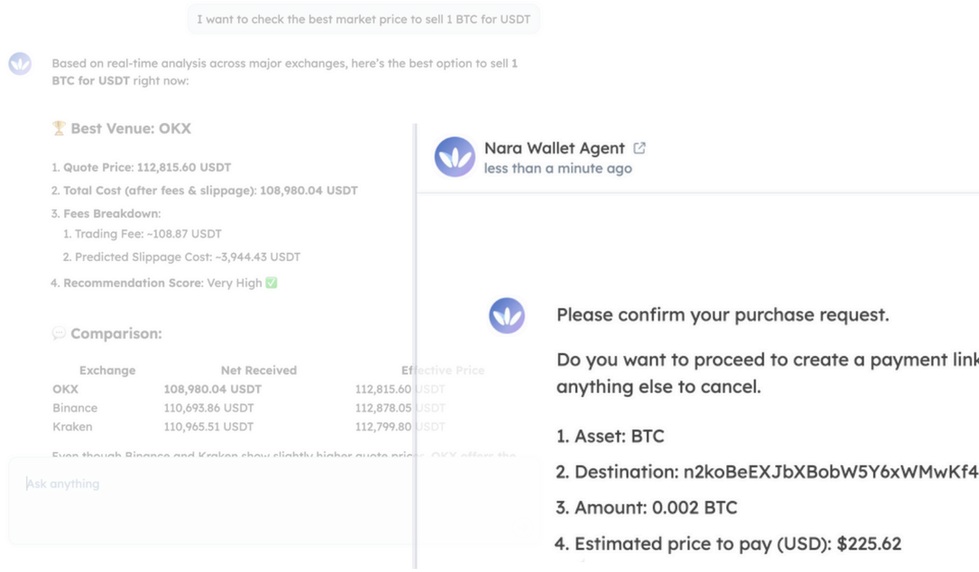

- **Wallet apps are too complex for beginners.**
- **UI/UX is often unintuitive and confusing.**
- **Buying crypto and checking prices requires multiple platforms.**
- **Lack of natural, conversational interaction makes the experience rigid and intimidating.**

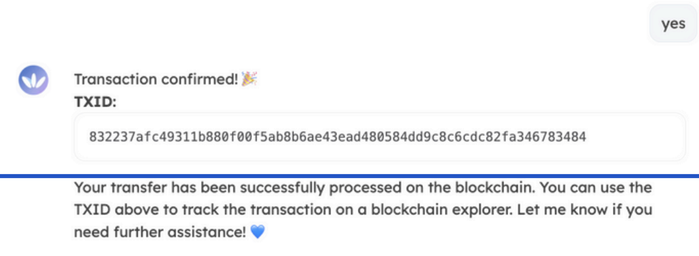

Nara Wallet by Nara Team

Goals and Solution

- **Simplify crypto usage** – eliminate technical barriers for beginners.
- **Enhance accessibility** – interact in everyday language.
- **Enable seamless fiat on-ramp** – buy crypto directly within the chat interface.
- **Support smarter decisions** – real-time price comparisons and fiat conversion.
- **Drive broader adoption** – intuitive and enjoyable experience for mainstream users.

Product Overview

Nara Wallet is an AI Agent for crypto management designed to make digital asset usage simple, intuitive, and accessible. Through natural conversation, users can perform essential actions like creating wallets, receiving assets, checking balances, and purchasing crypto with fiat. The system also provides real-time price data across multiple markets and recommends the best rates.

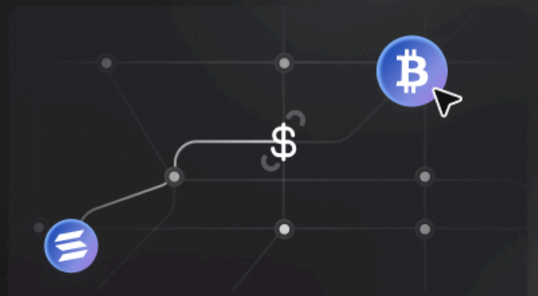

Nara Features

All action, in one chat!

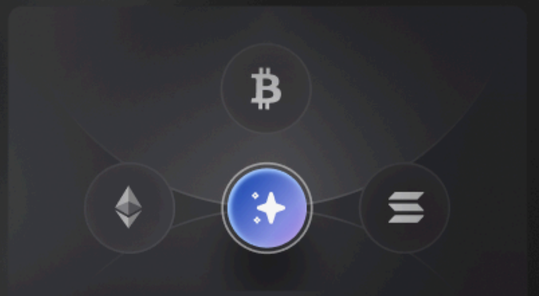

Crypto Transfers

Send BTC, ETH, and SOL with fee preview, ETA, network validation, QR support, and real-time tracking.

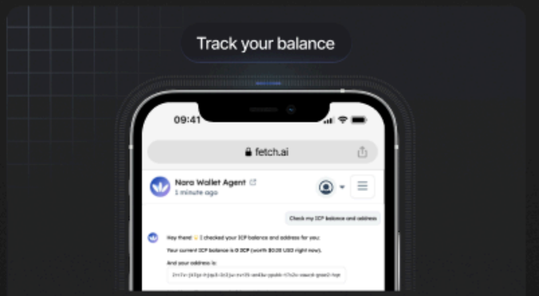

Receive Address

Instantly surface your address and QR with clear "correct network only" reminders and memo/tag hints when needed.

Create Wallet Addresses

Generate new addresses for BTC, ETH, and SOL. Labeled and ready to receive or send without technical friction

Real-time Balances

See time-stamped balances for each asset in a single, easy snapshot—no app-hopping.

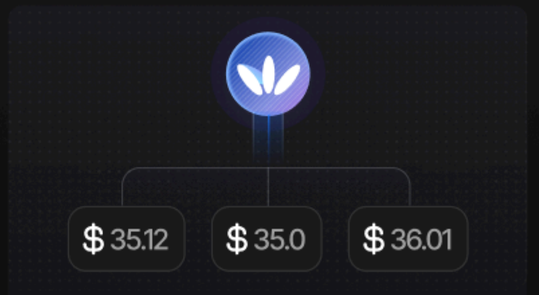

Buy with Fiat

Purchase crypto without leaving chat. Every cost is shown upfront; coins are delivered to your address on success.

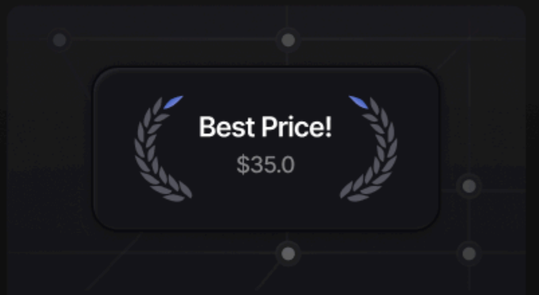

Crypto → Fiat Conversion

Get live BTC/ETH/SOL rates to USD/IDR (and more) so you always know what your holdings are worth.

Market Price Comparison

Compare CoinGecko, CoinMarketCap, and Coinbase. View deltas and the most competitive price at a glance.

Price Recommendation

Let the AI suggest the cheapest/trusted market for your purchase, with a short rationale and confidence indicator.

Nara Wallet

Your wallet, just a chat away.
